Floor Based Puzzle

Directions (31-35): Read the following information carefully and answer the questions given below:

Ten persons A, B, C, D, E, P, Q, R, S and T are living in a five storey building such as ground floor is numbered as 1, just above it is numbered as 2 until the top most floor is numbered as 5. Each of the floor has 2 flats in it as flat-1 and flat-2. Flat-1 of floor-2 is immediately above flat-1 of floor-1 and immediately below flat-1 of floor-3 and so on. In the same way flat-2 of floor-2 is immediately above flat-2 of floor-1 and immediately below flat-2 of floor-3 and so on. Flat-2 is in east of flat-1. B lives on floor-2 and E lives to the west of B. There are two floors gap between B and Q. S lives to the east of R. Q does not live in the same flat number as R. There are two floors gap between D and P. A lives to the west of D but does not live on ground floor. T lives above C. T and C live in same flat number.

Solution:

From the given statements, B lives on floor-2 and E lives to the west of B. There are two floors gap between B and Q. S lives to the east of R. Q does not live in the same flat number as R. Here, we get three possibilities i.e. Case 1, Case 2 and Case 3.

	Case 1		Case 2		Case 3	
Floors	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		Q		Q		Q
4	R	S				
3			R	S		
2	E	B	E	B	E	B
1					R	S

From the given statements, there are two floors gap between D and P. Here, Case 1 and Case3 are ruled out. A lives to the west of D but does not live on ground floor. T lives above C. T and C live in same flat number.

So, the final arrangement will be: -
